ecostrad

Powering progress  
towards a greener future  
with our smart electric  
heating solutions

Ecostrad designs and manufactures market-leading electric heating products for a range of domestic and commercial settings. Our comprehensive suite of products includes WiFi-controlled ceramic core radiators, smart infrared heaters, heat-retentive designer electric radiators, sleek towel rails, and more. Easy installation, lengthy warranties and UK-based technical support all come as standard, guaranteeing top quality across the board.

## Now Available for Wholesale

The UK's most forward-thinking electric heating brand is available for wholesale. With a large UK stock holding, contact us to find out how you can access our extensive range of globally sourced, competitively priced products, designed and manufactured to capture the essence of 21st century living.

- ✓ No Large Stocking Required
- ✓ Latest Specification Products
- ✓ Robust Product Warranties
- ✓ Highly Competitive Prices
- ✓ UK-Based Technical Support & Training
- ✓ Extensive Sales & Marketing Support
- ✓ Free On-site Next Day Delivery

## Benefits of choosing **ecostrad**

### World Class Customer Support

From initial enquiry to after-sales support, we are driven by our need to provide the very best customer service in the industry.

### Styles for Every Space

We take great care providing products that blend stunning style with exceptional functionality and value.

### Ahead of the Curve

All of our solutions represent the latest technological advancements in electric heating and offer unrivalled control, efficiency and style.

### Carbon-Conscious Solutions

Our suite of Lot 20 approved electric heating products are primed for a carbon-free future, taking advantage of electricity's green potential.

### Affordability Without Compromise

Our products are designed to be affordable without customers having to sacrifice control or aesthetics in the process.

### Ecostrad Ecosystem app

Our in-house heating app has been meticulously designed to deliver superior smart control via WiFi, streamlining energy usage in just a few taps.

Introducing the **New**

# MAGMA **HHR**

**Silent.**  
**Smart.**  
**Sustainable.**

New for 2025, the Magma HHR is designed for modern living, blending ergonomic design with advanced German technology. Superior insulation and precision engineering ensure maximum efficiency and heat retention, rigorously tested for reliability. This isn't storage heating of the past - it's high retention heating for the modern world.

### **Economical Operation**

Programmable Charging Times to Suit Tariffs

### **Silent Performance**

Exclusive fan-less design

### **Effortless Control**

Clear and easy-to-use interface

# Magma HHR Redefining Storage Heating

## Futureproof Heating

The Magma HHR is a revolutionary step forward in heating efficiency. Crafted with German-manufactured precision and featuring a unique vent system, the Magma is SAP accredited - meeting the specification criteria for HHR storage heaters, so you can buy with confidence knowing it will provide cost-effective, reliable warmth. With a streamlined installation process, both installers and end users will benefit from a faster, hassle-free setup that guarantees comfort from day one.

# Unique Silent Operation Vent System

Exclusive to the UK market, the Magma HHR features a silent automatic vent system. When extra heat is needed, the vent opens to allow more airflow to the ceramic bricks. This energy-efficient system strikes a perfect balance between manual venting and fan-assisted models, providing quiet warmth with zero waste.

## Built for Efficiency

The automatic charge feature adjusts power intake based on your settings and previous usage, so there's no risk of over or undercharging. Each heating element operates individually, switching off as soon as the desired temperature is reached. This precise control means less wasted energy and more savings on energy bills. The Magma works to your schedule - not the other way around.

ecostrod

## Magma HHR Product Features

- High Heat-Retentive Ferolite Brick Core
- Exclusive Venting System – Silent Running
- WiFi Compatible with SmartHub
- Convenient Boost Mode
- Adaptive Smart Start
- Comfort, Eco & Anti-Frost Modes
- Suitable for 8-16 Hours of Charge Time
- Top-Up Heating Element Available
- 10 Year Warranty on Heater Body

## Innovation in every detail

The next generation of the iQ Ceramic has arrived, now available with your most-asked-for features. With a redesigned LCD display for streamlined control and an on-demand boost mode, our flagship radiator redefines the gold standard for modern heating. Built to heat deep into its ceramic core, it stores warmth and releases it gradually, providing lasting comfort long after it's turned off. Integrated WiFi control and an overhauled motion sensor makes the iQ Ceramic an efficient, intelligent solution for the way you heat today. No compromises - just outstanding performance.

Model	Size (WxHxD)	Wattage	Heat Area	Weight	Finish

## iQ Ceramic - Heat that's fast, Heat that lasts

Every feature has been carefully developed to make saving energy easier and more intuitive than any other electric radiator on the market. Ceramic plates inside the radiator body provide optimum heat retention, allowing it to produce up to 50% of its warmth as long-lasting radiant heat. The iQ Ceramic reaches set temperatures quickly for responsive heating but is also slow to cool, keeping rooms comfortable using substantially less energy. Offering outstanding efficiency, the iQ Ceramic locks warmth deep into its core to provide heat even after the radiator has stopped drawing power.

## Ecowärme

12 Models Available

White

Anthracite

High-quality heating  
that fits seamlessly  
into your home

Ceramic plates inside the Ecowärme provide extra heat retention, keeping rooms warm using less energy. Extra-deep fins on the front surface maximise contact with the air to quickly and efficiently bring rooms up to temperature.

# Ceramic stone heating technology

The Ecowärme is the best of both worlds, offering quick convected heat using heating elements in the base, as well as a more enduring radiant heat from its ceramic stone plates.

Improved Efficiency with Heat-Retentive Tablets

Quick & Responsive Heating

Slower Cool-Down Time

The deep pleats on the Ecowärme maximise its surface area for greater contact with the air, allowing quick and effective heat transfer that warms spaces with ease. These fins aren't just for enhanced efficiency - they also give the Ecowärme a timeless aesthetic that perfectly matches central heating radiators.

A new benchmark  
for precision heating

With built-in WiFi control, an intuitive control panel and a wealth of energy-saving features, the Ecostrad Klasse iQ is our smartest German electric radiator yet. Highly efficient, it has been carefully crafted to retain heat for longer through its ceramic stone core.

## Heat-retentive ceramic core

Close-packed ceramic heating elements and individually spot-welded fins are a testament to the superior manufacturing quality of the Klasse iQ. Its deep-ribbed design offers a larger surface area to maximise heat transfer, with its efficient stone core holding warmth for more lasting and robust heat.

Improved Efficiency with Heat-Retentive Tablets

Quick & Responsive Heating

Slower Cool-Down Time

## Integrated WiFi Control

Unlike other German radiators on the market, the Ecostrad Klasse iQ is WiFi-ready straight out of the box. No external hubs or accessories required: simply pair with the Ecosystem app on your smartphone and experience intuitive heat management from the palm of your hand.

Quality engineering.  
Enhanced efficiency.  
Superior style.

The Icon iQ is the high-performance electric radiator you've been waiting for, combining premium German engineering with a sleek, modern look. As the first of its kind on the UK market, it features a contemporary smooth surface over deep flutes – offering a fresh new take on traditional German design. WiFi ready and equipped with advanced energy-saving features, the Icon iQ ticks every box when it comes to future-proof heating.

# Unmatched Heating Performance

Experience powerful, efficient heating with the Icon iQ's 50:50 blend of convection and radiant heat. Designed with advanced Thermolock Retention technology, it warms both your space and the people in it, providing lasting comfort for up to 45 minutes. Individually spot-welded fins along the back of the radiator channel hot air past the ceramic core, allowing the Icon iQ to keep warmth circulating efficiently, even in draught-prone spaces.

German Engineered

# Electric Towel Rail

## Control Types

Our electric towel rails come with three different levels of control. Stemming from basic manual programming to innovative WiFi app control, our sophisticated heating elements come in tow with a wealth of energy-saving features.

### Basic Control

Simple on/off operation for hassle-free warmth, ideal for use on an ad-hoc basis.

### Thermostatic Control

Fitted with a digital thermostat accurate to 0.5°C, for precise temperature management.

### iQ WiFi Control

Connect to the Ecosystem app and make remote changes from anywhere with an internet connection.

## Fina-E

48 Models Available

- White
- Chrome
- Anthracite
- Black

A timeless staple  
for bathrooms  
large and small

Classically designed with a choice of four colourways, the Fina-E electric towel rail is the essential dual-purpose bathroom heater. With the option of basic, thermostatic and WiFi programming, the Fina-E is as adaptable as it is stylish.
