

TriQ WiFi Heating Element

Re-define control of your designer radiator or towel rail with the Ecostrad TriQ WiFi Heating Element – the first of its kind to feature a dual-orientation LCD touchscreen, designed for seamless use on both horizontal and vertical radiators. Combining sleek minimalist styling with intuitive touch and WiFi app control, the TriQ offers 24/7 programming, multiple heating modes, and precise room and radiator temperature management. Supplied with a fitted plug for simple DIY installation (excluding bathrooms), the TriQ makes upgrading to smarter electric heating easier than ever.

Technical Details

Display dimensions	66x66x50mm (WxHxD)
Colours	Chrome
Installation	Plug fitted. Hardwired professional installation in bathrooms.
Connection thread	G ½ inch
Cable length	1.2m
Voltage	Voltage 220-240V, 50Hz
Protection	IPX4, Class I
Warranty	2 years
Certifications	CE UK CA

Compatibility

The Ecostrad TriQ WiFi Heating Element must be fitted in a radiator or towel rail filled with a suitable liquid heating medium. The heating medium should be a glycol-based thermal fluid formulation approved by the radiator or towel rail manufacturer. Always follow the radiator manufacturer's guidance on fill levels or seek the advice of a qualified heating engineer.

Ecostrad has tested and confirmed compatibility with our range of designer radiators and towel rails, but we cannot guarantee the heating performance of any non-Ecostrad product paired with the element. Seeking the advice of the radiator manufacturer before installing is recommended.
